

Oklahoma State University
Postdoctoral Research Fellow (Immunotherapy, nanomedicine, oncology)

A postdoctoral position is available in the laboratory of nanomedicine and targeted therapy at Oklahoma State University. Candidates with a PhD in the field of biomedical engineering, immunology, molecular biology, and nanomedicine are preferred. Salary is competitive and commensurate with experience.

Specific Responsibilities of this position will include:

- Perform project related experiments in the following fields: in vitro and in vivo model development, hyperthermia, nanomedicine, molecular biology, and immunology
- Supervise graduate and undergraduate students working directly on various projects in the lab.
- Participate in various lab management responsibilities
- The total initial appointment will not exceed 1 year, and renewal will be based on job performance and confirmed availability of support.
- This will be an exempt position (which indicates that the position is exempt from overtime pay/comp time accrual). According to OSU policy, a 40-hour workweek is considered minimal for exempt staff. Candidate will be expected to work hours in excess of 40 hours per week when the work load requires additional hours (to include some early mornings, evenings and/or weekends).

Applications should be submitted to ashish.ranjan@okstate.edu, and must include a letter of interest, curriculum vitae, short and long-term research goals and a list of 2-3 references.

Oklahoma State University (OSU) strives to provide a safe study, work, and living environment for its faculty, staff, volunteers, and students. OSU conducts pre-employment background checks on final candidates. Offers of employment are contingent upon the successful completion of a background check. The type of background check conducted varies by position and can include, but is not limited to, criminal (felony and misdemeanor) history, sex offender registry, motor vehicle history, financial history, and/or education verification.
